Korean Elementary Course Curriculum

Our Korean for Absolute Beginners course syllabus provides a first contact with the language for those students with no previous knowledge or studied it a long time ago. The syllabus is based on different topics that will help you get by when meeting Korean speaking people. At the same time, it introduces the workings and sounds of the language and it provides the necessary tools to enable students to make sentences from scratch.

Prior Knowledge and Skills

This course is aimed at students with no or little knowledge of the language.

Course Aim

At the end of the course students should be able to engage in easy conversational communication such as exchanging greetings, asking and answering simple questions and writing basic sentences. The course also aims to develop learners' socio-cultural knowledge.

Revision

Language is learned best with maximum contact and usage. Home exercises will be designed for revision and consolidation of each course segment. Revision is most effective when undertaken regularly in short sessions.

Assessment

Assessment is optional at the end of the full year course or equivalent. Listening and Speaking skills are assessed throughout the course. An examination to assess Reading and Writing competencies is held at the end of the course and a statement of attainment is then issued. A certificate of attendance is available upon request for students not undertaking assessment who have attended at least 75% of the course.
